

Prism Balloon Light (PBL 500 LED) mounted on a custom hitch

PBL 500 mounted on a custom hitch in the back of a HONDA Pilot SUV – connected via converter to the battery of the vehicle.

Prism Balloon Light (PBL 500 LED) mounted on a custom hitch

Prism Balloon Light (PBL 500 LED) mounted on a custom hitch

DC to AC converter
connected to battery of the
vehicle and PBL 500 unit
connected to the converter
for smooth operation of the
light.

Prism Balloon Light (PBL 500 LED) mounted on a custom hitch

For railroad industry – the PBL unit can be mounted on the hitch of the back of the truck with high rails and can provide omni directional anti-glare lighting for ease of operation. We test drove the SUV up to 30 mph, and with proper additional tethering can be driven at higher speeds.
